Note per montaggio

I contenitori del programma Cinquanta3 vengono consegnati montati.

Note per la sicurezza

L'apertura contemporanea delle ante o dei cassetti di una base a terra o in appoggio può causarne il ribaltamento. Consigliamo quindi il fissaggio a muro.

Assicurarsi che la parete sia idonea a sostenere il peso delle basi sospese, le quali non devono essere soggette a carichi eccessivi.

Si raccomanda di eseguire la foratura con sistema a sola rotazione (non a percussione) e successivamente un'accurata pulizia del foro prima dell'installazione.

È importante verificare sempre le condizioni e la tenuta dei muri. Le basi sospese non possono essere installate su pareti divisorie, in cartongesso o comunque su pareti non portanti.

Assembly notes

The Cinquanta3 system's storage units come ready assembled.

Notes on safety

Opening all the doors or drawers at the same time on a floorstanding or sit-on-top base unit may cause it to tip over. Hence we recommend fastening it to the wall.

Make sure that the wall is strong enough to take the weight of wall-mounted base units, which must not be subjected to excessive loads.

Make sure you drill holes using rotation only (no percussion system) and then clean the hole thoroughly before installing units.

It is important to always check the state and soundness of walls. Wall-mounted base units cannot be installed on partition walls, stud walls or any wall that is not load bearing.
